

## 11th EURO-ASIAN SYMPOSIUM ON ECONOMIC THEORY (EASET-2024) «ECONOMIC THEORY: SEARCHING FOR DEVELOPMENT ALTERNATIVES»

Dear colleagues!

We invite you to participate in the 11th Euro-Asian Symposium on Economic Theory (EASET-2024) “Economic theory: searching for development alternatives”, which will take place in Ekaterinburg on June 26–28, 2024. The organizer of the event is the Institute of Economics UB RAS.

The Symposium on Economic Theory strives to combine the efforts of the scientific community in order to solve urgent development problems of economic theory. While a wide range of questions concerning the development of economic thought is considered, every year, special attention is paid to one particular complex and debatable issue.

The purpose of the 2024 Symposium is to exchange research experience and search for effective solutions to development problems of modern economic theory in the context of turbulence and accelerated technological development of economic systems. It is planned to discuss the following topics: conceptual foundations of mainstream and political economy; alternative directions for the development of theoretical economics; mechanisms of interaction of economic theories to construct a new world order. Additionally, the contribution of economic theory to solving the problems of the expansion of new technologies, inequality, environmental justice, globalization, regionalization and a polycentric world will be considered.

### The scope of the Symposium includes:

- Is there a crisis in economic theory?
- Construction of socio-economic mechanisms of a new order in the context of economic theory.
- Mainstream VS political economy: global challenges.
- Economic theory in Education system.
- Interdisciplinary synthesis in the development of economic theory: results and further prospects.
- Idea of progress in the history of economic thought.
- Transformation of socio-economic systems: orthodox and heterodox approaches.
- Knowledge economy as a progressive basis for the development of society.
- Inequality & justice: empirical results.
- The influence of Internet technologies and artificial intelligence on socio-economic development.
- Environmental justice
- Globalization VS regionalization: dialogue of civilizations
